How does the product work?

Apply a desired amount of the lubricant onto the selected body parts and spread it onto the skin. The water based formula gives the product a light and easy spreadable texture, which is neutral to the skin. This lubricant creates a soft and comfortable feeling during use.

A water-based formula like this will be largely absorbed by the skin over time. Apply extra lubricant during use if desired to ensure a continuous pleasurable gliding. This lubricant can be easily washed off if necessary.
